PROFILE SUMMARY

B.Tech CSE (Data Science) student with a 9.01 CGPA, offering hands-on software engineering experience across full-stack development, machine learning, and system deployment. Built and deployed end-to-end applications combining backend APIs (FastAPI), real-time data processing, and ML model integration, with practical exposure to MongoDB database and deployment via Render and GitHub.

EDUCATION

Bachelor of Technology (B. Tech) – Data Science	2023– 2027
Rajeev Gandhi Memorial College of Engineering and Technology	CGPA: 9.01

PROJECTS

Netflix Movie Recommendation System

- Merged and preprocessed multiple relational datasets (105K watch history logs, 52K recommendation logs, 15K reviews, and 10K user profiles), handling missing data and duplicates to yield 50,000 clean training records.
- Implemented and evaluated classification models to predict user click-through rates (was_clicked), achieving 84.7% accuracy with Random Forest, 82.2% with KNN, and 72.4% with Decision Tree.

Medical Appointment No-Show Prediction

- Developed an end-to-end predictive machine learning model to classify patient appointment no-shows and optimize clinic scheduling efficiency.
- Engineered key features from raw reminder SMS logs, patient demographic profiles, and medical history using Random Forest .Evaluated model performance across key evaluation metrics (precision, recall, F1-score).

Live Show Capture (Multimodal Emotion Recognition)

- Engineered a real-time multimodal emotion recognition system using a FastAPI backend and frontend to process live video and audio streams.
- Implemented facial expression analysis by sampling video frames via OpenCV and classifying emotions using a Vision Transformer (ViT) model (vit-face-expression).Integrated audio processing via FFmpeg to extract speech signals, classifying vocal emotions using a Wav2Vec2 model

TECHNICAL SKILLS

Programming Languages: Python, Java, C
Data Science & Processing: Pandas, NumPy, Scikit-learn
Machine Learning: Model Training & Testing, Data Preprocessing
Data Visualization: Power BI, Matplotlib
Database & Querying: SQL ,MongoDB
Deployment & Tools: GitHub, Render
Core Fundamentals:DBMS,Object-Oriented Programming

ACHIEVEMENTS & CERTIFICATIONS

- 2nd Prize - DataSprint Hackathon (Data Science & Analytics)
- 2nd Prize - Dev Quest Web Development Hackathon and college SQL Hackathon
- Participant - Smart India Hackathon (Internal Round) & RGM CET 24-Hour Hackathon
- Associate Data Analyst Certification – DataCamp
- NPTEL Elite Certification – Data Analytics with Python
